

## Congratulations on purchasing your Tobacor Humidor Classic!

Please keep **this manual** for future reference.

### Instructions in other languages

Scan the **QR code** to access this manual in **English, French, Spanish, Italian** and more.

## Safety Instructions

Your Tobacor Humidor Classic is a handcrafted product made from **Spanish cedarwood**, designed to provide **optimal storage conditions** for your cigars.

Please ensure that the humidor is not exposed to **direct sunlight** or placed near **heat sources**, as this could cause damage to both the humidor and your cigars.

The included **cigar cutter** has **sharp blades** and should be kept **out of reach of children**.

The **polymer crystals** inside the **humidifier** are **not suitable for consumption**.

If any parts are swallowed, seek **medical attention** immediately.

## Initial Setup

Before using your humidor for the first time, wipe the interior with a **dry** or slightly **damp, lint-free cloth**.

Then, place a **bowl of distilled water** inside the empty humidor and close the lid for approximately **3-7 days**.

As this is a **natural wooden product**, the time needed for the **cedar** to absorb moisture may vary.

Check the **hygrometer** regularly.

As soon as the **humidity** reaches **70%**, remove the bowl and activate the **humidifier**.

## Activating the Humidifier

Soak the **humidifier** in **distilled water** for about **15 minutes**, allow excess water to drain, and then wipe it with a cloth to remove any remaining moisture.

Place the humidifier inside the humidor, ensuring it does not come into **direct contact** with the cigars.

If necessary, use the **divider** to maintain a safe distance between cigars and humidifier.

A light **rattling sound** when shaking the humidifier indicates that it needs to be **reactivated**.

## Long-Term Care

The optimal **humidity level** for your humidor is between **65% and 70%** at a temperature of **18-21 °C (64-70 °F)**.

Please note that **analog hygrometers** may show a deviation of **±5%**. This is not a cause for concern, as the hygrometer mainly serves as a **reference** to monitor humidity.

Exact values are not necessary as long as the humidity remains within the recommended range.

If you prefer more precise readings, we recommend using a **digital hygrometer**, as they are generally more **accurate** and often include additional features such as **temperature measurement**.

For precise humidity regulation, a **two-way humidity control system** like **Boveda** is especially suitable.

It maintains a **consistent humidity level** and can also be used to check the **accuracy** of your hygrometer.

To maintain your humidor, we recommend cleaning it every **3 months** with a slightly **damp, lint-free cloth**.

Use only **distilled water** to prevent **bacterial growth** and to preserve the **quality** of your cigars.

# Technical Information & Legal Notice

## Product Specifications

**Product Name:** Tobacor Humidor Classic

**Product Number:** BD-TOB-HC01

**Dimensions:** 26 × 22 × 6,5 cm

**Weight:** approx. 1.15 kg

## Scope of Delivery

1x **Tobacor Humidor Classic** with divider and glass window

1x **Analog hygrometer** for optimal humidity control

1x **Tobacor humidifier** for consistent storage conditions

1x **Tobacor cigar cutter** for the perfect cut

1x **Tobacor cleaning cloth** for a flawless shine of your humidor

1x **User-friendly instruction manual**

1x **Exclusive black gift box**

## Warranty & Contact

We offer a **24-month warranty from the date of purchase** – for your satisfaction and peace of mind.

For complaints and returns, please **contact Amazon Customer Service directly** using your account.

If you have **general questions about the product**, please contact us and include the **batch number**, which can be found on the **bottom of your humidor**.
